

Condo Outdoor Lighting Policy

Each individual unit owner is responsible for the maintenance of their outdoor lighting fixtures and for keeping bulbs replaced when needed. We have found the two most common reasons making a light inoperable is a burned out bulb or a defective photo electric cell.

We will strive to let a unit owner know when a light is not operating. It is then up to the unit owner to take care of the problem. If help is needed, please phone KMC at 570-4358 to arrange for assistance.
